

Fw: Whitmire Lake Breech Repair

7/6/26 10:30 AM

From: "Bill Stransky" <txrice@att.net>

To: "James Morel" <James.Morel@tpwd.texas.gov>,"Steven J. Raabe" <trustee@mbmtrust.com>,wilsonalamobay@aol.com

Attached and below are before and after photos of the Whitmire Lake breach repair on the Foester Whitmire NWR.

The filling of the breach and shaping of the levee look excellent.

We hope to install a lake overflow in that area to continue to feed water during rain events into the 75-100 acres of marsh below the levee.

The repairs combined with the spraying of exotic/invasive species will allow for the lake to function as it has for decades and provide excellent habitat to spectacular numbers of wading birds, shorebirds, waterfowl and other wetland dependent birdlife.

Thanks,

Bill S.
